## Office Action Summary

Application No.

10/735,394

Applicant(s)

EUTENEUER ET AL.

Examiner

Joshua L. Pritchett

Art Unit

2872

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --  
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

### Status

- 1) ☒ Responsive to communication(s) filed on 09 May 2006.  
2a) ☒ This action is FINAL. 2b) ☐ This action is non-final.  
3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

### Disposition of Claims

- 4) ☒ Claim(s) 1-48 is/are pending in the application.  
4a) Of the above claim(s) \_\_\_\_\_ is/are withdrawn from consideration.  
5) ☐ Claim(s) \_\_\_\_\_ is/are allowed.  
6) ☒ Claim(s) 1-48 is/are rejected.  
7) ☐ Claim(s) \_\_\_\_\_ is/are objected to.  
8) ☐ Claim(s) \_\_\_\_\_ are subject to restriction and/or election requirement.

### Application Papers

- 9) ☐ The specification is objected to by the Examiner.  
10) ☒ The drawing(s) filed on 12 December 2003 is/are: a) ☒ accepted or b) ☐ objected to by the Examiner.  
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).  
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).  
11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

### Priority under 35 U.S.C. § 119

- 12) ☒ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).  
a) ☒ All b) ☐ Some \* c) ☐ None of:  
1. ☒ Certified copies of the priority documents have been received.  
2. ☐ Certified copies of the priority documents have been received in Application No. \_\_\_\_\_.  
3. ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).

\* See the attached detailed Office action for a list of the certified copies not received.

### Attachment(s)

- 1) ☒ Notice of References Cited (PTO-892)  
2) ☐ Notice of Draftsperson's Patent Drawing Review (PTO-948)  
3) ☐ Information Disclosure Statement(s) (PTO-1449 or PTO/SB/08)  
Paper No(s)/Mail Date \_\_\_\_\_.  
4) ☐ Interview Summary (PTO-413)  
Paper No(s)/Mail Date \_\_\_\_\_.  
5) ☐ Notice of Informal Patent Application (PTO-152)  
6) ☐ Other: \_\_\_\_\_.

### **DETAILED ACTION**

This action is in response to Amendment filed May 9, 2006. Claims 1, 2, 5 and 12-18 have been amended as requested by the applicant.

#### ***Claim Objections***

Claims 4, 9 and 10 are identical claims objected to because of the following informalities: claims 4, 9 and 10 recite identical limitations and all depend from claim 3. Examiner assumes claim 4 should depend from claim 1, claim 9 should depend from claim 2 and claim 10 should depend from claim 3. The application will be examined based on the examiner's assumption of dependency. Appropriate correction is required.

#### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1, 2, 5 and 12 are rejected under 35 U.S.C. 102(b) as being anticipated by Reinheimer (US 4,619,503).

Art Unit: 2872

Regarding claim 1, Reinheimer discloses an inverted microscope having a U-shaped microscope housing (Fig. 3), on one limb (T) whereof is provided a housing attachment surface (6) for attachment of a module (5), wherein the housing attachment surface is parallel to the based of the inverted microscope (Fig. 3) and wherein the module comprises a horizontally protruding based unit (Fig. 3) having on the one hand a binocular tube (Fig. 3; col. 5 line 40) placed thereon, and on the other hand a photo tube (6a; examiner assumes that the reference numeral 5a in Fig. 3 is misplaced and should be labeled 6a), with photo device placed thereon (col. 5 lines 45-49) and the binocular tube and the photo tube extend above the housing attachment surface when the module is attached to the housing attachment surface (Fig. 3).

Regarding claim 2, Reinheimer discloses the module is embodied as a one-piece combination module (Fig. 3) and has on its underside a module attachment apparatus that is configured to be attached to the housing attachment surface (col. 4 lines 28-32).

Regarding claims 5 and 12, Reinheimer discloses an infinity beam exists in the region of an attachment surface of the module attachment apparatus (Fig. 3).

### ***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 3, 4, 6-11 and 13-48 rejected under 35 U.S.C. 103(a) as being unpatentable over Reinheimer (US 4,619,503).

Regarding claims 3 and 8, Reinheimer teaches the vertical optical axis of the photo beam bundle, extending in the one limb penetrates through a first optical deflection element after entering the base unit and then pass through the first tube lens arrange in the photo tube with photo device attached while the observation beam deflected at the optical deflection element after passage through a second tube lens and after deflection at a second deflection element enters the binocular tube (col. 5 lines 40-49). Reinheimer teaches the claimed invention except for binocular tube and photo tube being reversed. It would have been obvious to one having ordinary skill in the art at the time the invention was made to reverse the binocular tube and the photo tube, since it have been held that a mere reversal of working parts of a device involves only routine skill in the art. One would have been motivated to reverse the binocular tube and the photo tube for the purpose of eliminating any aberrations introduced into the observed image by deflecting the observation beam, thus allowing the user to see a sharper image.

Regarding claims 4 and 9-11, Reinheimer teaches the invention as claimed but lacks optical deflection element brought into and out of working position in the Fig. 3 embodiment. Reinheimer teaches the an optical deflection element (25) moving in and out of a working position (Fig. 4). It would have been obvious to one of ordinary skill in the art at the time the invention was made to have the Reinheimer invention include in the Fig. 3 embodiment the ability to move an optical deflection element into and out of a working position for the purpose of determining providing all light to either the viewer or an image capturing device so that the

Art Unit: 2872

image views or captured is brighter due to all the intensity going to one instead of splitting the intensity between the two.

Regarding claims 6, 7 and 19-48, Reinheimer teaches the invention as claimed but lacks reference to different corrections for the photo tube and the binocular tube. It is extremely well known in the art to use periplan correction for flat field eyepieces and HC correction for magnetic recording media. Official Notice is taken. It would have been obvious to one of ordinary skill in the art at the time the invention was made to have the Reinheimer invention include the corrections as known in the art for the purpose of producing a clear image to both the viewer and the photo device.

Regarding claims 13-18, Reinheimer teaches an infinity beam exists in the region of an attachment surface of the module attachment apparatus (Fig. 3).

### *Response to Arguments*

Applicant's arguments, see Amendment, filed May 9, 2006, with respect to the rejection(s) of claim(s) 1 under Takahama have been fully considered and are persuasive. Therefore, the rejection has been withdrawn. However, upon further consideration of the newly amended claim limitations, a new ground(s) of rejection is made in view of Reinheimer. Applicant argued that the Takahama reference failed to teach the claimed parallel relationship between the housing attachment surface and the base of the microscope. The examiner agreed. Reinheimer has been used to teach the claimed limitations.

*Conclusion*

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a).

Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Joshua L. Pritchett whose telephone number is 571-272-2318. The examiner can normally be reached on Monday - Friday 7:00 - 3:30.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Drew A. Dunn can be reached on 571-272-2312. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
